FOREWORD

The National Curriculum Framework (NCF), 2005, recommends that children's life at school must be linked to their life outside the school. This principle marks a departure from the legacy of bookish learning which continues to shape our system and causes a gap between the school, home and community. The syllabi and textbooks developed on the basis of NCF signify an attempt to implement this basic idea. They also attempt to discourage rote learning and the maintenance of sharp boundaries between different subject areas. We hope these measures will take us significantly further in the direction of a child-centred system of education outlined in the National Policy on Education (1986).

The success of this effort depends on the steps that school principals and teachers will take to encourage children to reflect on their own learning and to pursue imaginative activities and questions. We must recognise that, given space, time and freedom, children generate new knowledge by engaging with the information passed on to them by adults. Treating the prescribed textbook as the sole basis of examination is one of the key reasons why other resources and sites of learning are ignored. Inculcating creativity and initiative is possible if we perceive and treat children as participants in learning, not as receivers of a fixed body of knowledge.

These aims imply considerable change in school routines and mode of functioning. Flexibility in the daily time-table is as necessary as rigour in implementing the annual calendar so that the required number of teaching days are actually devoted to teaching. The methods used for teaching and evaluation will also determine how effective this textbook proves for making children's life at school a happy experience, rather than a source of stress or boredom. Syllabus designers have tried to address the problem of curricular burden by restructuring and reorienting knowledge at different stages with greater consideration for child psychology and the time available for teaching. The textbook attempts to enhance this endeavour by giving higher priority and space to opportunities for contemplation and wondering, discussion in small groups, and activities requiring hands-on experience.

National Council of Educational Research and Training (NCERT) appreciates the hard work done by the Textbook Development Committee responsible for this book. We wish to thank the Chairperson of the advisory group in Science and Mathematics, Professor J.V. Narlikar and the Chief Advisor for this book, Dr. N. Rathnasree for guiding the work of this committee. Several teachers contributed to the development of this textbook; we are grateful to their principals for making this possible. We are indebted to the institutions and organisations which have generously permitted us to draw upon their resources, material and personnel. We are especially grateful to the members of the National Monitoring Committee, appointed by the Department of Secondary and Higher Education, Ministry of Human Resource Development under the Chairpersonship of Professor Mrinal Miri and Professor G.P. Deshpande, for their valuable time and contribution. As an organisation committed to systemic reform and continuous improvement in the quality of its products, NCERT welcomes comments and suggestions which will enable us to undertake further revision and refinement.

Foreword

The Government of Andhra Pradesh has unleashed a new era in school education by introducing extensive curricular reforms from the academic year 2020-21. The Government has taken up curricular reforms intending to enhance the learning outcomes of the children with focus on building solid foundational learning and to build up an environment conducive for an effective teaching-learning process. To achieve this objective, Government of Andhra Pradesh has decided to implement the NCERT curriculum for Class 6th from the academic year 2023-24 to reach the global standards.

As a part of the curriculum reform, SCERT, Andhra Pradesh has translated the NCERT content of Science into Telugu language with the consent of NCERT and developed it into Bilingual textbook. QR codes are incorporated in the beginning of each lesson to enrich the content of the subject and to enable learning outside the classroom. In this textbook, lessons on the themes like Food, Living world, Physical World, Chemistry are incorporated under Sciences. In order to reinforce the concepts, several projects and activities are given to inculcate scientific temperament. Each lesson is provided with eye catching illustrations to engage the children. The salient features of the lessons are given under the title "What you have learnt for the review of the important concepts. Questions are framed for each lesson to recapitulate the conceptual understanding and to achieve competencies required for project works, drawings and model making under "Exercises" An effort has been made to relate the scientific concepts with the real-life events thereby developing and promoting scientific temperament in "Extended Learning Activities and Projects".

We are grateful to our Honourable Chief Minister Sri Y.S. Jagan Mohan Reddy for being our source of inspiration to carry out this extensive reform in the Education Department. We extend our gratitude to our Honourable Minister of Education Sri Botcha Satyanarayana for striving towards qualitative education. Our special thanks to Sri Praveen Prakash, IAS, Principal Secretary, School Education Sri S. Suresh Kumar IAS, Commissioner of School Education & State Project Director, Samagra Shiksha A.P, and Ms. Nidhi Meena IAS, Special Officer English Medium Project - AP for their constant motivation and guidance.

We convey our special thanks to the NCERT for their cooperation and assistance in adopting their curriculum. We also thank to our translaters, editors and layout designers for their contribution in the development of this textbook.

We invite constructive feedback from the teachers and the parents in further refinement of the textbook.

RATIONALISATION OF CONTENT IN THE TEXTBOOKS

In view of the COVID-19 pandemic, it is imperative to reduce content load on students. The National Education Policy 2020, also emphasises reducing the content load and providing opportunities for experiential learning with creative mindset. In this background, the NCERT has undertaken the exercise to rationalise the textbooks across all classes. Learning Outcomes already developed by the NCERT across classes have been taken into consideration in this exercise.

Contents of the textbooks have been rationalised in view of the following:

- Overlapping with similar content included in other subject areas in the same class
- Similar content included in the lower or higher class in the same subject
- Difficulty level
- Content, which is easily accessible to students without much interventions from teachers and can be learned by children through self-learning or peer-learning
- Content, which is irrelevant in the present context

This present edition, is a reformatted version after carrying out the changes given above.
